

Questions for the Panel:

1. Are you aware of any published or unpublished information available to the general public that may be relevant to the classification of eyelid weights that raises any types of safety concerns different from those included in the enclosed packet of information?

If you are aware of relevant information or data, please identify the data or information and state the specific findings that are relevant.

2. Is there any other consideration that has not been addressed that the Panel believes is critical to their recommendation on classification of eyelid weights?
